SUMMARY

Software engineer with strong foundations in backend development, distributed systems, and reliable service design. Built secure APIs, real-time processing systems, and data-driven backend platforms using Java and Python, with strong DSA fundamentals and passion for large-scale distributed systems and infrastructure reliability.

EDUCATION

Panimalar Engineering College <i>B.Tech – Artificial Intelligence & Data Science CGPA: 8.59</i>	Chennai, India 2022 – 2026
Sri Sankara Vidyalaya <i>HSC – 73.67% SSLC – 74.4%</i>	Chennai, India 2020 – 2022

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript
Backend & Systems: Spring Boot, Spring Security, Flask, REST APIs, SQLAlchemy
Databases: MySQL, SQLite
Tools: Git, GitHub, Postman, Maven, IntelliJ IDEA, VS Code
Concepts: DSA, OOP, SOLID, System Design, Exception Handling, Reliability Engineering
Other: JWT, React.js, OpenCV, YOLOv8, MediaPipe

PROJECTS

Trust Commerce Engine <i>Java, Spring Boot, Spring Security, JWT, MySQL</i>	2025
- Built a secure backend service with stateless JWT authentication, RBAC for ADMIN/BUYER/SELLER, and BCrypt-based credential protection. - Implemented a rule-based risk engine to compute seller trust scores and automate ALLOW, WARN, PREPAID_ONLY, or BLOCK decisions per order. - Designed REST controllers, DTO-based APIs, global exception handling, and payment lifecycle flows across INITIATED, SUCCESS, FAILED, and REFUNDED states.	
AI-Based Railway Security System <i>Python, FastAPI, OpenCV, YOLOv8, React.js</i>	2025
- Built a real-time surveillance pipeline for face recognition, gesture detection, and event triggering with throughput-aware frame processing. - Developed an alert workflow that stored image evidence, sent structured events to a FastAPI backend, and triggered email notifications. - Created a React dashboard with live MJPEG feed, periodic alert polling, and monitoring-oriented views for control room usage.	
Interview Scheduling & Conflict Detection <i>Java, Spring Boot, MySQL, JavaScript</i>	2024
- Implemented DB-level conflict detection to prevent interviewer double-booking and added role-based flows for candidates and interviewers. - Built structured error handling, duplicate email validation, and a lightweight dashboard consuming REST APIs in real time.	

EXPERIENCE

ServiceNow Virtual Intern — ServiceNow (AICTE)	2024
<i>Worked on incident management, workflow automation, and agile-based task execution.</i>	

CERTIFICATIONS & PUBLICATION

Oracle – Generative AI Certified | **Infosys Springboard** – AI Specialization (Apr 2025) | **Coursera** – Java & Cloud Computing | **IIRS** – AI/ML Geospatial Analysis
Publication – “AI-CoachGuard: Smart Eyes Inside Every Compartment and Station” – IRJAEH Vol. 3, No. 12, Dec 2025
