SUMMARY

Java Backend Developer with hands-on experience building scalable REST APIs, secure microservices, and AI-powered real-time systems. Developed a JWT-secured payment engine using Spring Boot, an AI-based railway surveillance system using Python, OpenCV and YOLOv8, and a conflict-free interview scheduling platform. Proficient in system design, OOP, SOLID principles and clean architecture. Targeting product-based engineering roles.

EDUCATION

Panimalar Engineering College <i>B.Tech – Artificial Intelligence & Data Science CGPA: 8.7</i>	Chennai, India 2022 – 2026
Sri Sankara Vidyalaya <i>HSC – 73.67% SSLC – 74.4%</i>	Chennai, India 2020 – 2022

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript
Backend: Spring Boot, Spring Security, JWT, JPA/Hibernate, FastAPI, Flask, REST APIs
AI / CV: OpenCV, MediaPipe, YOLOv8, face_recognition, TensorFlow, PyTorch
Databases: MySQL, SQLite (SQLAlchemy ORM)
Tools: Git, GitHub, Postman, IntelliJ IDEA, VS Code, Maven
Concepts: System Design, OOP, SOLID, DSA, Design Patterns, Concurrency
Frontend: React.js, HTML, CSS, Axios

PROJECTS

Trust Commerce Engine <i>Java, Spring Boot, JWT, Spring Security, MySQL, Postman</i>	2025
- Built stateless JWT auth with Spring Security filter chain — RBAC for ADMIN, BUYER, SELLER with BCrypt password encoding and custom JwtAuthenticationFilter. - Implemented Rule-Based Risk Engine computing seller trust score (0–100) — returning ALLOW, WARN, PREPAID_ONLY or BLOCK with tier (GOLD/SILVER/RISKY) auto-assignment per order. - Designed 6 REST controllers with DTOs, global exception handling and payment lifecycle management (INITIATED to SUCCESS/FAILED/REFUNDED) — tested 20+ endpoints via Postman.	
AI-Based Railway Security System <i>Python, OpenCV, YOLOv8, MediaPipe, FastAPI, React.js</i>	2025
- Built real-time AI surveillance detecting criminal faces (HOG, 0.6 tolerance, 35% frame scaling), help gestures (MediaPipe 15-frame fist detection with miss-frame decay) and gender (OpenCV DNN). - Built AlertManager with cooldown-controlled triggering — saves JPEG evidence, posts to FastAPI/SQLAlchemy backend and sends email with image attachment via SMTP SSL. - Created React.js control room dashboard with live MJPEG feed, 2-second polling alerts, stats cards and offline fallback — fully routed with React Router.	
Interview Scheduling & Conflict Detection <i>Java, Spring Boot, MySQL, JavaScript</i>	2024
- Built conflict detection using JPA derived query preventing double-booking at DB level with role-based user management for CANDIDATE and INTERVIEWER roles. - Implemented global exception handling with structured JSON error responses, duplicate email detection and a vanilla JavaScript dashboard with real-time refresh.	

EXPERIENCE

ServiceNow Virtual Intern — ServiceNow (AICTE)	2024
<i>Incident management, workflow automation and agile-based task execution on ServiceNow platform.</i>	

CERTIFICATIONS & PUBLICATION

Oracle – Generative AI Certified | **Infosys Springboard** – AI Specialization (Apr 2025) | **Coursera** – Java & Cloud Computing | **IIRS** – AI/ML Geospatial Analysis
Publication – “AI-CoachGuard: Smart Eyes Inside Every Compartment and Station” – IRJAEH Vol. 3, No. 12, Dec 2025
